Mothers’ and Children’s Specialty Directory
University of Minnesota Health is proud to provide the very best in mothers' and children’s health care.

When your patients become our patients, they have access to cutting-edge treatments and advanced therapies through our partnership with the University of Minnesota. This relationship was founded on a tradition of excellence and commitment to discovery. The result is innovative care that's based on the latest research and technology. Safety and teamwork are a priority, and we encourage collaboration among our providers.

Our referral process is designed to make it easy for your patients to receive treatment from one of the largest and best pediatric teams in the nation. We have convenient locations in the Twin Cities metro area, so mothers and children can get care as often as needed. All of our patients have access to award-winning University of Minnesota Masonic Children’s Hospital, named the top children’s hospital in the metro area by U.S. News & World Report. This state-of-the-art facility provides a broad range of treatment options and amenities, ensuring a high level of comfort and care.
Our Service Commitment

- Access to our expertise—we are available to consult about your patients, with or without a referral.
- Appointment access—our goal, whenever possible, is to see your patient within five days if requested.
- Follow-up communication—you will hear from us within a week after we see your patient.
- 24/7 referrals—through our Physician Referral Service, you can make a referral, request a consult or admit a pediatric patient at 888-KIDS-UMN (888-543-7866), or an adult patient at 844-273-8383.

Physician Referral Service

We value our relationship with you, your patients and your office staff. Through our Physician Referral Service, you can schedule patient appointments or request consultations in a few easy steps.

To make a referral to specialists at University of Minnesota Masonic Children’s Hospital, choose an option to the right.

Call a referral service representative.

ABUSE (see Support Services, Center for Safe and Healthy Children, page 40)

ADOPTION MEDICINE
As the only adoption outpatient clinic in Minnesota, we serve families with children adopted domestically, internationally and in foster care. We provide ongoing consultations and whole-child assessments at all stages.

More information at MHealth.org/KidsAdoption.

FEATURING
- Pre-adoption medical consultation and review of adoption file referrals
- Post-adoption clinical care, including comprehensive assessments of physical, emotional and developmental/behavioral milestones
- Fetal alcohol spectrum disorder (FASD) evaluations and intervention recommendations

SERVICES
Adoption Medicine, Pediatric Specialty Care Discovery Clinic
- Coordination of care and referrals to medical specialties
- Developmental, behavioral, psychological or other medical concerns
- Fetal substance exposure evaluations (FASD or other prenatal drug exposures)
- New/current foster care, domestic adoption and international adoption evaluations

Developmental Behavioral Pediatrics Clinic
- Cognitive, social-emotional and behavioral testing for children ages five and older
- Psychological evaluations to assess cognitive development and developmental trajectory

ADVANCED THERAPY SERVICES
We offer world-renowned clinical care and an interdisciplinary program with a national reputation for excellence. Our leading-edge research gives patients access to advanced therapy options for a wide range of rare diseases related to inborn errors of metabolism, lysosomal disorders and enzyme replacement therapy.

FEATURING
- Interdisciplinary program with national reputation for excellence
- Access to University of Minnesota Gene Therapy Center
- Both hospital-based and home infusion services

AUDIOLGY
Our cochlear implant audiologists are the most experienced in the Twin Cities. We have more audiologists with specialty certification in Pediatric Audiology (PASC) than any other clinic in Minnesota and surrounding areas.

More information at MHealth.org/KidsAudiology.

FEATURING
- Consultation, fitting and follow-up for:
  - Hearing aids/amplification
  - Loaner hearing aid fittings through the Minnesota Lions Loaner Program
  - Bone conduction hearing technology (i.e., BAHA)

(Medical) Minnesota Lions
Children’s Hearing and ENT Clinic
Park Plaza Building, Floor 2
2512 S. 7th St., Minneapolis, MN 55454
612-626-4260

Provider referrals: 612-365-8300
Audiology
(Continued from previous page.)
- Cochlear implant evaluation
- Cochlear implant programming
- Auditory brainstem response (ABR) evaluations, both sedated and non-sedated

Services
Minnesota Lions Children’s Hearing and ENT Clinic
- Aural rehabilitation, speech and language therapy
- Comprehensive, age-appropriate hearing evaluations
- Newborn hearing screening follow-up
- Speech-language evaluations for children who are deaf and hard of hearing

Autism Spectrum and Neurodevelopmental Disorders
(see Behavioral Services and Substance Use, see below)

Behavioral Services and Substance Use

Behavioral Services and Substance Use
Our fully licensed team works with children experiencing mental health and substance use/chemical dependency issues. We created our dual diagnosis program to address the link between these concerns. By involving the entire family in treatment, we provide more effective solutions.

Featuring
- Behavioral emergency care available 24/7 for children and teens having a mental health and/or substance use crisis
- Personalized, comprehensive assessment and treatment of learning disorders, psychotic disorders, substance use and other behavioral needs

Services
Behavioral Emergency
Emergency Department, University of Minnesota Medical Center-West Bank
- Behavioral emergency care for patients of all ages is available 24/7

Mental Health Inpatient and Outpatient
University of Minnesota Medical Center-West Bank
- Individualized mental health services for children ages 5 to 18, including inpatient, partial hospitalization program, day therapy and residential programs
- Intensive family therapy and education
- Life skills development
- Referral to outpatient and other services as needed
- Training in specialized intervention techniques for families and school personnel

Fairview Clinics – Chisago City
Adolescent Substance Use Disorder Outpatient Program
- Dual diagnosis evaluation and treatment for adolescents 12 to 19 and their families
- Discharge planning and support
- Group, individual and family therapy
- Medical consultations and exams with a pediatrician
- On-site schooling with individualized academic plans
- Primary chemical health treatment
- 24-hour residential treatment

Adolescent Dual Diagnosis Day Programs
University of Minnesota Masonic Children’s Hospital
- Dual diagnosis evaluation and treatment for adolescents 12 to 19 and their families
- Patient and family support and counseling

Fairview Adolescent Dual Diagnosis Outpatient Program
Grandview Office Center
- Dual diagnosis evaluation and treatment for adolescents 12 to 19 and their families
- Patient and family support and counseling

THE BIRTHPLACE (see Women’s Health, page 52)

BIRTH TO THREE MENTAL HEALTH CLINIC (see Behavioral Services and Substance Use, page 10)

BIRTH TO 3 MENTAL HEALTH CLINIC

We are the first pediatric program in Minnesota to serve children from birth to age 3 with histories of toxic stress. We also provide consultations for children from birth to school age who have experienced toxic stress. These early stressors include multiple hospitalizations, chronic illness, stressful transitions, high-risk safety and wellbeing situations and/or parents who are struggling with stress.

FEATURING

- Assessments of parent-child relationship and psychological evaluation of child's developmental status
- Evidence-based interventions such as trauma-informed child-parent psychotherapy, trauma-focused cognitive behavioral therapy and relationship-based therapy

SERVICES

Pediatric Specialty Care Discovery Clinic
Clinical interventions to address behavioral difficulties such as:
- Aggressiveness and impulsivity
- Developmental concerns in language or socialization
- Emotional issues, including fear and anxiety
- Problems with sleep regulation and eating patterns

As long-time national leaders in blood and marrow transplant (BMT) care, we performed the world’s first successful BMT in 1968. Today, our program is one of the most respected in the world, leading the way in BMT research and care. Innovative treatment options such as umbilical cord blood transplantation for patients with high-risk acute leukemias and other metabolic diseases continue to make us national leaders in this field.

More information at MHealth.org/KidsBMT.

**FEATURING**

- Phase 1 clinical trials program
- Umbilical cord blood transplantation
- Survivor program

**SERVICES**

Specialized care for rare diseases, including:
- Bone marrow failure disorders, including Fanconi anemia
- Epidermolysis bullosa
- Hemoglobinopathies, including sickle cell disease
- High-risk leukemias/lymphomas
- Inherited immune system disorders
- Inherited metabolic disorders, i.e., Hurler and Adrenoleukodystrophy (ALD)
- Malignant brain & spinal cord tumors
- Myelodysplastic syndromes
- Vascular and venous malformations

INFLAMMATORY BOWEL DISEASE (IBD) PROGRAM

Our program is a founding member of ImproveCareNow, an international program for quality improvement research and collaboration in pediatric IBD. Our patients and their families have access to a support group and may also participate in a parental oversight and support committee.

FEATURING

- Comprehensive diagnostic evaluation of IBD
- Growth assessment and management, including full nutritional evaluation by a dietitian with expertise in IBD
- Individual treatment planning and follow-up care, including medical treatment and nutritional therapy and maintenance therapy
- Coordinated care with other pediatric specialties, including ophthalmology, endocrinology, rheumatology and surgery

SERVICES

- Crohn’s disease (involving the gastrointestinal tract, mouth, esophagus, stomach, small intestine or colon)
- Eosinophilic gastroenteritis and eosinophilic esophagitis
- Indeterminate colitis
- Proctitis
- Ulcerative colitis (involving only the large intestine)

GENETICS AND METABOLISM

As Minnesota’s primary program, we treat pediatric patients with genetic disorders and inherited metabolic conditions throughout their lifetime.

FEATURING

- Treatment of lysosomal storage disorders, including:
  - Fabry disease
  - Gaucher disease
  - Mucopolysaccharidosis
  - Tay-Sachs disease
- Treatment of:
  - Inborn errors of metabolism
  - Chromosome abnormalities
  - Noonan syndrome
  - Phenylketonuria (PKU)

SERVICES

- Genetic counseling
- Screening, testing and treatment

PHENYLKETONURIA (PKU)

PKU is a rare, inherited metabolic disease which is treatable by adopting a diet low in phenylalanine. Our PKU clinic provides multidisciplinary care from registered dietitians and medical experts in nutritional health, metabolic disorders and related specialties.

SERVICES

- Disorders of biopterin synthesis and regeneration
- Hyperphenylalaninemia (Hyperphe)
- Maternal PKU syndrome

PHENYLKETONURIA (PKU)

PKU is a rare, inherited metabolic disease which is treatable by adopting a diet low in phenylalanine. Our PKU clinic provides multidisciplinary care from registered dietitians and medical experts in nutritional health, metabolic disorders and related specialties.

SERVICES

- Disorders of biopterin synthesis and regeneration
- Hyperphenylalaninemia (Hyperphe)
- Maternal PKU syndrome

Our pediatric heart care team is proud to help children lead normal, healthy lives through innovative cardiac options. We specialize in the surgical repair of many complex heart conditions and are the only hospital in Minnesota providing less invasive, hybrid surgical procedures.

**FEATURING**

- Preventive cardiology program
- Comprehensive heart failure and transplant program
- Only pediatric heart program in the Twin Cities to offer the full complement of surgical options, including neonatal primary repair, off bypass surgical intervention, hybrid procedures with interventional cardiologist, and mechanical circulatory support with ventricular assist device
- Pulmonary hypertension program
- Interventional cardiology
- Cardiac genetics program
- Hyperlipidemia/obesity program
- Fetal cardiology program for prenatal diagnosis of congenital heart defects and fetal arrhythmia management

**SERVICES**

**University of Minnesota Masonic Children’s Hospital/ Pediatric Specialty Care Explorer Clinic**
- Cardiac genetics program
- Cardiac transplantation
- Cardiovascular Intensive Care Unit (CVICU)
- Comprehensive heart failure and transplant program
- Congenital heart disease
- Electrophysiology testing (EKG, Holter monitoring, event recorders)
- Metabolic storage disease program
- Single ventricle clinic
- Specialty care for cardiac arrhythmias
- Specialty care for murmurs
- Specialty consultation for cardiac catheterization procedures

**Specialty Clinic for Children – Burnsville**
- Congenital heart disease program
- Congestive heart failure and cardiac transplantation
- Electrophysiology testing (EKG, Holter monitoring, event recorders)
- Specialty care for cardiac arrhythmias
- Specialty care for heart murmurs

**Pediatric Specialty Care**

**University of Minnesota Health Maple Grove Clinics**
- Congenital heart disease program
- Congestive heart failure program
- Electrophysiology testing (EKG, Holter monitoring, event recorders)
- Specialty care for cardiac arrhythmias
- Specialty care for heart murmurs

---

**HEMATOLOGY-ONCOLOGY**

Our hematology providers are internationally known for their care and management of blood disorders. We have the only National Cancer Institute-funded Children’s Oncology Group Phase I Program in Minnesota, and offer more clinical trials than other area hospitals. We offer a full range of pediatric hematologic and oncology services.

**FEATURING**

- COG phase 1 clinical trials
- Cancer risk management program
- Leukemia and lymphoma clinic
- Cancer survivor program
- Integrative health and wellbeing program
- Neurofibromatosis clinic
- Neuro-oncology program
- Solid tumor program
- MIBG therapy for neuroblastoma

**SERVICES**

**Center for Children with Cancer and Blood Disorders**

**Pediatric Specialty Care Journey Clinic**
- Acute and chronic anticoagulation management
- Anemia, thrombocytopenia
- Anti-cancer biological therapies
- Blood-brain barrier disruption
- Blood clotting disorders
- Chemotherapy, including new and developing therapies (Phase 1 agents)
- Clotting tendencies
- Extracorporeal circulation management
- Leukemia
- Sarcoma

HEPATOLOGY (see Gastroenterology, page 17)

HOME CARE AND HOSPICE (see Support Services, Pediatric Pain, page 45)

IMAGING AND RADIOLOGY (see Support Services, page 45)

INFECTIOUS DISEASES AND IMMUNOLOGY
Our team works together to prevent, identify and treat serious infections. We offer expert care options for children who are particularly susceptible to infections. We are engaged in clinical trials of vaccines, antimicrobial stewardship, management of infections during pregnancy, infections in international travelers and infections in low birth weight/premature infants.

FEATURING
- Collaborative antiviral study group
- NIH and March of Dimes Birth Defects Foundation-funded studies of congenital and perinatal viral infections
- Clinical trials of vaccines
- Collaborative consultation with OB/GYN, perinatology and maternal-fetal medicine for high-risk pregnancies
- Evaluation and care of children with congenital and genetic immune deficiencies
- Follow-up care of serious infections in hospitalized children
- Management of infection complications in premature infants

SERVICES
- Antimicrobials
- Disease management
- HIV care
- Hospital-acquired illnesses
- Immunodeficiency disorders
- International and immigrant health
- Vaccines

NEONATOLOGY, NEONATAL INTENSIVE CARE UNIT (NICU) AND NICU FOLLOW-UP CARE

The NICU at University of Minnesota Masonic Children’s Hospital is part of our nationally ranked neonatology program. We are a Level IV unit, providing the highest standard of care for premature or critically ill babies. Our neonatologists provide clinical coverage at the Level III NICUs at Fairview Ridges Hospital, Fairview Southdale Hospital, Maple Grove Hospital and North Memorial Health Hospital.

FEATUREING
- Top-ranked NICU in Minnesota by U.S. News & World Report for the 6th year in a row
- Designated as one of two March of Dimes NICU Family Support® programs in Minnesota
- Neuro NICU with specialized care for babies with neurologic conditions
- Extended NICU follow-up care for five years
- The latest technology, research and clinical trials

SERVICES

University of Minnesota Masonic Children’s Hospital
- All surgical conditions
- Cancer and tumors
- Cardiac abnormalities
- Conditions requiring cardiopulmonary bypass (ECMO)
- Congenital anomalies
- Extreme prematurity (32 weeks and beyond)
- Intrauterine growth restriction
- Metabolic/endocrine conditions
- Neurological conditions
- Ophthalmology
- Pulmonary disorders/conditions
- Renal conditions, including neonatal dialysis

Fairview Ridges Hospital / Fairview Southdale Hospital
Maple Grove Hospital / North Memorial Health Hospital
- Cardiopulmonary failure
- Congenital anomalies
- Intrauterine growth restriction
- Metabolic/endocrine conditions
- Neurological conditions
- Ophthalmologic conditions
- Prematurity (extreme prematurity at North Memorial Health Hospital)

NEPHROLOGY (KIDNEY CARE AND DIALYSIS)

Our nephrology program has been recognized as one of the best in the nation for nearly a decade. Our specialists have performed the highest number of pediatric kidney transplants and have the highest reported infant kidney transplant success rate in the world.

More information at MHealth.org/KidsNephrology.

FEATUREING
- U.S. News & World Report has recognized our program as one of the nation’s best since 2009
- Kidney transplants, including laparoscopic kidney donation and paired exchange
- Minnesota’s only pediatric-dedicated dialysis center
- Dedicated team of nurses, nutritionists and social workers

SERVICES

Kidney Center
University of Minnesota Masonic Children’s Hospital
- Acute and chronic dialysis services
- Patient and family-centered care with Child-Life Family Services
- State-of-the-art facility dedicated to the care of children and adolescents with end-stage renal disease (ESRD) who require dialysis

Pediatric Specialty Care Discovery Clinic / Pediatric Specialty Clinic – Woodbury
- Acute and chronic dialysis services and living and deceased donor kidney transplants
- Assessments and treatment of elevated blood pressure (hypertension)
- Diagnostic kidney biopsies, usually as an outpatient procedure
- Evaluations of children and adolescents with hematuria (blood in the urine) and high urine protein levels (proteinuria)
- Treatment of acute, chronic and end-stage kidney disease in children and adolescents, including:
  - All causes of renal failure
  - Congenital urinary tract anomalies
  - Glomerulonephritis
  - Hemolytic-uremic syndrome
  - Nephritic syndrome
  - Poly cystic kidney disease
  - Systemic lupus erythematosus
- Treatment related to complications of chronic kidney disease such as anemia, bone disease and slow growth

NEUROLOGY

We are proud to partner with University of Minnesota Medical Center to bring more care options to our pediatric patients. As a result, children affected by neurologic disorders have access to expert providers, cutting-edge research and experimental therapies.

More information at MHealth.org/KidsNeurology.

FEATURING

- Brain malformations, genetic and neurometabolic disorders
- White matter disorders including adrenoleukodystrophy and other forms of leukodystrophies
- MDA Care Center for patients with neuromuscular disorders including muscular dystrophies, spinal muscular atrophy, myasthenia gravis and related disorders and peripheral neuropathies

SERVICES

Pediatric Specialty Care Journey Clinic
- Concussions
- Developmental delay including hypotonia and abnormal gait
- Epilepsy
- Leukodystrophies
- lysosomal storage diseases
- Movement disorders including tic disorder, dystonia and others
- Neurodegenerative disorders
- Peroxisomal disorders

Pediatric Specialty Care Discovery Clinic
- Autonomic dysfunction
- Concussions
- Developmental delay including hypotonia and abnormal gait
- Epilepsy and other paroxysmal disorders
- Leukodystrophies
- Movement disorders
- Neurologic complications of metabolic disease

NEUROPSYCHOLOGY

Our specialists recognize the role of genetics, disease, injury, economic background and family relationships in treating the whole child. We provide a full evaluation and diagnosis to help identify the child’s strengths and potential improvement in brain functioning.

FEATURING

- Comprehensive neuropsychological assessments
- Care for conditions including:
  - 22q11.2 deletion syndrome (22q)
  - Asperger’s syndrome
  - Attention deficit hyperactivity disorder
  - Developmental delay
  - Down syndrome
  - Hydrocephalus
  - Neurofibromatosis
  - Schizophrenia
  - Tourette syndrome
  - Traumatic brain injury

SERVICES

- Attention deficit hyperactivity disorder
- Baseline prior to transplant
- Brain tumor recovery
- Concussion and traumatic brain injury
- Emotional and behavioral concerns
- Fetal alcohol syndrome
- Genetic disorders
- Intellectual disabilities
- Movement disorders
- Neurofibromatosis
- Neurological disorders and their neuropsychological results
- Nonverbal learning disabilities
- Prematurity
- Recovery following treatments for leukemia and cancer
- School programming concerns
- Sickle cell disease
- Tourette syndrome and tic disorders

Our neurosurgical care team has the skills and experience necessary to provide the best possible treatment outcome for our pediatric patients. Our patients have access to in-depth clinical trials and treatments based on the very latest research, resulting in better care options.

**FEATURING**
- Minimally invasive techniques for tumors and other brain lesions, including radiosurgery and neuro-endoscopy
- Cutting-edge technology to improve brain and spine surgery safety, including robotic surgery, image guidance, and intraoperative neuro-monitoring

**SERVICES**
- Brain and spine tumors
- Brain, spinal cord and other neurological surgery
- Chiari malformation and syringomyelia
- Craniofacial conditions and deformities
- Experimental brain tumor therapies
- Hydrocephalus
- Neuro-endoscopy
- Radiosurgery (minimally invasive techniques)
- Spina bifida
- Tethered cord syndrome

**CRANIOFACIAL DISORDERS**  
(CLEFT AND CRANIOFACIAL PROGRAM)

We specialize in improving facial appearance, speech, development and quality of life for children with complex craniofacial syndromes and conditions.

**FEATURING**
- 22q11.2 deletion syndrome (Velocardiofacial, DiGeorge syndrome)
- Abnormal head shape/plagiocephaly
- Beckwith-Wiedemann syndrome
- Cleft lip, cleft palate and craniofacial feeding problems
- Craniosynostosis
- Hemangiomas
- Hemifacial microsomia (oculosauriculovertebral spectrum)
- Microtia
- Pierre Robin sequence
- Syndromic craniofacial anomalies such as:
  - Apert syndrome
  - Crouzon syndrome
  - Pfeiffer syndrome
  - Stickler syndrome
  - Treacher Collins syndrome
  - Torticollis

Our registered dietitians serve patients in both clinic and hospital settings. We help patients understand how food works in the body and develop personalized nutrition plans to promote healing.

**SERVICES**
- Cancer
- Cardiac abnormalities
- Cystic fibrosis
- Growth and weight issues
- Phenylketonuria (PKU) and other metabolic disorders
- Prematurity
- Renal disease (peritoneal dialysis and hemodialysis)
- Short-bowel syndrome

**ONCOLOGY** (see Hematology-Oncology, page 21)

**OPHTHALMOLOGY**

We are one of the country’s largest and most respected pediatric ophthalmology programs, offering comprehensive orthoptic, optometric and ophthalmologic services. Built on a foundation of academic medicine, we provide cutting-edge medical and surgical treatments for the full spectrum of eye disorders.

**FEATURING**

- Treatment with glasses, prisms, and surgery for simple and complex strabismus and nystagmus
- Medical and surgical treatment of complex intraocular conditions in children, including cataracts, glaucoma, retinopathy of prematurity, and retinoblastoma
- Eyelid (drooping, malposition, or masses) and nasolacrimal (tearing) surgery
- Specialty care for patients with genetic eye disorders and retinal dystrophies

**SERVICES**

- Eye and periorbital trauma
- Eye problems related to other conditions such as thyroid eye disease
- Genetic eye disorders
- Optic nerve disorders
- Pediatric cataracts and glaucoma

---

**ORTHOPAEDICS** (see also Sports Medicine, page 39)

We fix broken bones. Our physicians are experts in scoliosis and spinal surgery. Our orthopaedic oncologists are recognized nationally for their work in bone and soft-tissue tumors and reconstructive surgery after oncology treatment. We offer walk-in orthopaedic services seven days a week.

**SERVICES**

**Orthopaedic Clinic**

OTOLARYNGOLOGY AND FACIAL PLASTIC SURGERY

Our team has a history of providing exceptional care, including performing the first pediatric cochlear implant surgery in Minnesota. Several disciplines work together in one building, allowing patients to see multiple providers in the same visit.

More information at MHealth.org/KidsENT.

FEATURING
- Complex care: otolaryngology experts meet weekly to create care plans for the most advanced ENT and plastic surgery care and techniques.
- Care coordination: Dedicated clinic nurse coordinator to coordinate same-day testing and collaborate with other specialties
- Comprehensive audiology services

SERVICES

Treatment of complex conditions, including:
- Airway abnormalities
- Cleft lip and palate
- Congenital aural atresia
- Cystic fibrosis sinustis
- Facial weakness
- Pediatric skull base tumors
- Speech and swallowing disorders
- Thyroid and parathyroid disease
- Tumors of the head and neck
- Vascular malformations
- Vocal cord paralysis

Facial plastic surgery, including:
- Animal bite repair
- Cleft lip and palate
- Craniofacial malformations
- Facial trauma
- Scar revision
- Velopharyngeal insufficiency

Hearing loss, including:
- Audiograms/audiology services
- Bone-anchored hearing aid implantation
- Cochlear implantation
- Hearing aid consults
- Ossicular chain reconstruction

PLASTIC AND RECONSTRUCTIVE SURGERY

Our experienced surgeons deliver world-class medical care for any part of the body affected by defects, abnormalities, trauma, infection or cancer in children.

FEATURING
- Breast reconstruction
- Gender affirmation surgery
- Wound management

SERVICES
- Adult and pediatric plastic and reconstructive surgery
- Cosmetic surgery
- Dermatologic procedures
- Hand surgery
- Otolaryngologic procedures

PRIMARY CARE (PEDIATRIC)

We provide coordinated care to patients from birth through young adulthood. We treat a variety of both acute and chronic conditions and provide preventive care, sports medicine and coordinated specialty care referrals as needed.

FEATURING
- Diagnosis and treatment of general health conditions
- Basic mental health services
- Management of chronic and acute conditions
- Development and behavioral assessments
- Growth and puberty disorders

SERVICES
- Pediatric and Family Medicine Primary Care University of Minnesota Health Maple Grove Clinics
  - Acute illness and injury care
  - Child family life support
  - Chronic illness care
  - INR clinic
  - Medication management
  - Patient education
  - Pediatric walk-in care
  - Physicals for camp, college and sports
  - Preventive care

**Cystic Fibrosis Center**

Consistently one of the top-ranked cystic fibrosis (CF) centers in lung function and nutrition in the country, providing comprehensive care for individuals with CF and their families throughout their lifetime.

More information at MHealth.org/KidsCysticFibrosis.

**Featuring**
- CF Foundation-accredited sweat testing laboratory
- Genetic counseling
- Pediatric nurse coordinators to aid in scheduling and management of clinical care
- Pediatric social work and mental health services
- Pulmonary function testing for both infants and children
- Referral assistance to other medical specialties
- Respiratory therapists and dietitians with expertise in pediatric CF

**Radiation Oncology**

We continue to advance the use of radiation therapy for childhood cancers and many other conditions, such as heterotopic bone formation and Fanconi anemia. We work closely with our colleagues in the blood and marrow transplant (BMT) program to improve our methods of total body irradiation. Our goal is to modify the treatment to improve patient outcomes, while reducing harm to other tissues.

**Featuring**
- GammaKnife® radiosurgery
- Image-guided radiation therapy (IGRT)
- Intensity-modulated radiation therapy (IMRT)

**Services**

**Pediatric Specialty Care Journey Clinic**
- COMS eye plaques
- Intensity-modulated radiation therapy (IMRT)
- Stereotactic body radiation therapy (SBRT)
- Total body irradiation (TBI)
- Total skin electron therapy (TSE)

**Radiation Oncology Clinic University of Minnesota Medical Center - East Bank**

- Stereotactic body radiation therapy (SBRT)
- Tomotherapy
- Total body irradiation (TBI)
- Total skin electron therapy (TSE)

**Respiratory Therapy** (see Pulmonology, page 35)

**Rheumatology**

We have the largest, most comprehensive pediatric rheumatology program in Minnesota. We provide care to children and adolescents who have rheumatic disease that includes various forms of arthritis (juvenile episodic and juvenile idiopathic), spondylarthropathy syndromes, lymes arthritis and viral arthritis. We also treat various multi-symptom diseases including Behc’t’s disease, lupus, mixed connective tissue disease, and scleroderma.

More information at MHealth.org/KidsRheumatology.

**Featuring**
- Regular pre-visit planning for all new patients
- Regular post-visit team review and planning for all patients with challenging diagnostic or therapeutic problems
- Coordination of care with other medical, surgical and imaging specialists (Continued on next page)
SLEEP MEDICINE (see also Pulmonology, page 35)

We are a comprehensive sleep center providing specialized care for infants, children and teens, treating infants as young as 2 months old.

For pediatric sleep study questions, call our sleep specialist at 612-273-3385. More information at MHealth.org/KidsSleep.

FEATUREING
- Evaluation of sleep disorders in infants, children and adolescents including full overnight sleep studies
- Ability to monitor pediatric sleep patients in their homes

SERVICES
- Cognitive behavioral therapy for insomnia
- CPAP therapy

RHEUMATOLOGY

(Continued from previous page)

SERVICES
Specialty Clinic for Children - Burnsville
- Access to participation in national and international studies of newest therapies and therapeutic approaches to rheumatic disease, translational research, long-term outcomes and safety research, and patient-reported outcomes research
- Full range of traditional oral and intravenous anti-inflammatory and immunosuppressive therapies for rheumatic diseases, including biologic response modifiers
- Infusion services

Pediatric Specialty Care Explorer Clinic
- Access to participation in national and international studies of newest therapies and therapeutic approaches to rheumatic disease, translational research, long-term outcomes and safety research, and patient-reported outcomes research
- Full range of traditional oral and intravenous anti-inflammatory and immunosuppressive therapies for rheumatic diseases, including biologic response modifiers
- Integrated in-clinic child-family life services, laboratory, and physical therapy services

Pediatric Specialty Clinic - Woodbury
- Full range of oral, intra-articular and subcutaneous anti-inflammatory and immunosuppressive therapies for rheumatic diseases, including biologic response modifiers
- Integrated in-clinic child-family life services, laboratory and physical therapy services

SEDATION, OBSERVATION AND ANESTHESIOLOGY

(see Support Services, page 46)

SPORTS MEDICINE (see also Orthopaedics, page 31)

Our physicians have additional certification in sports medicine and serve as team physicians for University of Minnesota Athletics and the Minnesota State High School League. They have been recognized for delivering one of the best patient experiences in the industry. Walk-in care is available seven days a week.

FEATUREING
- Treatment of:
  - Osteochondritis dissecans
  - Discord meniscus
  - Patellar dislocations
  - Calcium and bone disorders
  - Sports-related concussions
  - Platelet-rich plasma (PRP) and ultrasound-guided injections

**COUNSELING SERVICES**

Our therapists at Fairview Counseling Centers provide solution-centered therapy and support for emotional and psychological issues for children, teens and their families.

**LOCATIONS**

We have more than 20 centers throughout the Twin Cities and surrounding area, making it easy to find a location that’s convenient for you.

**SUPPORT SERVICES**

These services are available to patients in partnership with Fairview Health Services.

**CENTER FOR SAFE AND HEALTHY CHILDREN**

The Otto Bremer Trust Center for Safe and Health Children is dedicated to advancing the health and safety of abused and neglected children and adolescents. We provide comprehensive care for more than 500 children and families annually.

**FEATURING**

- The only hospital in Minnesota to join a nationwide campaign to end physical discipline by becoming a No Hit Zone
- Specialty care for physical and sexual abuse, neglect, drug exposure and psychological abuse, as well as other forms of child maltreatment
- On-call (24/7) pediatrician that specializes in child abuse and responds to providers’ questions or concerns about possible child maltreatment

**SERVICES**

- Inpatient and outpatient consultation services
- Multidisciplinary consultation including specially trained providers, child life, social work and forensic nurses, including documentation of injuries
- Trauma-focused cognitive behavioral therapy and relationship-based therapy

**CHILD-FAMILY LIFE SERVICES**

As experts in child development from infancy through adolescence, we help make what is complex and unfamiliar easier for children to understand. We provide support and education suitable for a child’s level of development and help them navigate their diagnosis and express their feelings. These services are also provided for siblings, and include grief and bereavement support as well as parent education.

**FEATURING**

- Assessments of parent-child relationship and psychological evaluation of child’s developmental status
- Evidence-based interventions such as trauma-informed child-parent psychotherapy, trauma-focused cognitive behavioral therapy and relationship-based therapy

**CRITICAL CARE**

**FEATURING**

- Pediatric Intensive Care Unit (PICU) provides care to critically ill infants, children and adolescents
- Pediatric Cardiovascular Intensive Care Unit (CVICU) provides care to critically ill infants, children, and adolescents with cardiovascular disease
- Inter-hospital critical care pediatric transport

**SERVICES**

- Acute asthma exacerbation
- Heart surgery, including transplant
- Life support procedures and monitoring, including various types of invasive respiratory support, all forms of kidney dialysis, ventricular devices for heart failure, and extracorporeal membrane oxygenation (ECMO)
- Management of overdoses
- RT and/or physician accompanied Pediatric Critical Care ground and air transports as warranted with telemedicine capability for all Fairview system hospitals
- Solid organ transplant
- Tertiary care for hematopoietic stem cell patients
- Total pancreatectomy with islet auto-transplant (TP-IAT) program

**CRITICAL CARE TRANSPORT**

Our specialized teams provide inter-hospital transport for neonatal and pediatric patients who require transfer for a higher level of care or specialty services. A neonatologist or pediatric intensivist physician helps ensure optimal care before and during the transport. Teams are dispatched within 30 minutes of alert via ambulance, helicopter or fixed-wing aircraft to the tri-state area in collaboration with advanced life support and critical care personnel from our partners at LifeLink III and HealthEast.

**FEATURING**

- The transport team may include a neonatal advance practice provider, pediatric intensivist, neonatal transport nurse, pediatric respiratory therapist and paramedic/EMT, depending on the patient’s clinical needs and characteristic
- Operations include a dedicated transport committee with a transport medical director to ensure a safe and standardized clinical practice prior to, during and after transport
- Transport includes incubators and equipment to provide conventional and high frequency ventilation, inhaled nitric oxide, active therapeutic body cooling and extracorporeal membrane oxygenation (ECMO)

**SERVICES**

- BIPAP or CPAP therapy
- Care for patients with un repaired cardiac defect, pulmonary hypertension or pulmonary hamorrhage
- Care for ventilated patients (intubated or trach) including high-frequency ventilation on transport
- Emergency line/access and medication management
- Extracorporeal membrane oxygenation (ECMO) support or transport service through our award-winning ELSO-registered ECMO program
- High-flow nasal cannula therapy
- Pediatric, cardiac and Level IV neonatal intensive care units
- Pediatric specialty care for general pediatrics, cardiothoracic surgery, neonurology, urology and ENT
- Pediatric surgical specialties for general pediatrics, cardiothoracic surgery, neonurology, urology and ENT
- Specialty medical gas therapy, including nitric oxide and heliox
- Therapeutic hypothermia while on transport
Our board-certified pediatricians are experts in managing acutely ill or injured patients in a hospital environment. They collaborate with both primary care and specialty providers to provide high quality, coordinated care for patients. Our hospitalists can be reached directly 24/7. Stable patients referred from clinic, urgent care or an outside emergency department may be good candidates for direct admission.

**INFUSION SERVICES**

Infusion care is managed by an integrated team of professionals who work together on each patient’s infusion needs. We are specialists in pediatric infusion therapy for all conditions.

**SERVICES**

- Antibiotics
- Biologics
- Blood products
- Enteral nutrition (food pump)
- Enzyme replacement therapy (ERT)
- Inotropes
- Intravenous immunoglobulin (IVIG)
- Lysosomal diseases
- Pain relief
- Pediatric oncology infusion
- Post-transplant medications
- Subcutaneous immunoglobulin (SCIG)
- Total parenteral nutrition (TPN)

INTEGRATIVE HEALTH AND WELL-BEING
Our program incorporates healing-oriented integrative medicine and therapies into your child’s care plan. We provide consultations to patients, their families and providers. A wide range of options such as traditional Chinese medicine, specialized nutrition and supplements, self-hypnosis, biofeedback therapy, energy therapy, music therapy and aromatherapy assist with well-being and preventive health.

LABORATORY MEDICINE AND PATHOLOGY
Our providers have specialty training in pediatric pathology and pediatric laboratory medicine. They provide expert consultation on the pathology and clinical laboratory testing for pediatric diseases, including genetic diseases, cancer, infections, cardiovascular disease, renal disease, diabetes and many others.

MEDICATION THERAPY MANAGEMENT
Specially-trained pharmacists work closely with patients and their physicians to solve medication-related problems and get the best results from drug therapies. To schedule an appointment, call 612-672-7005 or 866-332-3708 (toll free).

ORTHOTICS AND PROSTHETICS
Fairview Orthotics and Prosthetics bring together state-of-the-art technology and personal attention to provide the highest level of care. Our board-certified orthotists (body bracing) and prosthetists (artificial limbs) work closely together to provide the most appropriate care.

PEDICATRIC PAIN AND ADVANCED/COMPLEX CARE TEAM
An interdisciplinary team that provides pain and symptom management aimed to increase comfort and quality of life for children and families facing serious health conditions, both chronic and acute.

TRAUMA (see Support Services, Critical Care Transport, page 41)

TRANSPLANT CARE (SOLID ORGAN)

University of Minnesota Health surgeons have performed more than 12,000 transplants; more than 1,000 of these have been infants and children from across the globe. Worldwide, we’ve performed the largest number of infant and pediatric kidney transplants and have the most experience in pediatric total pancreatectomy with islet autotransplantation of any provider.

More information at MHealth.org/KidsTransplant.

FEATURING

• One of the few centers in the country offering intestinal transplants for children
• Minnesota’s first heart transplant and first infant heart transplant
• World’s first total pancreatectomy and islet auto-transplant (TP-IAT)
• Largest pediatric kidney transplant program in the world

SERVICES

• Clinical trial participation
• Complex organ transplant surgeries including heart, kidney, liver, intestine and multivisceral transplantation
• Kidney and liver living donor program
• Long-term hemodialysis and kidney transplant
• Total pancreatectomy with islet autotransplantation (TP-IAT)

Pediatric Consult  
A clinician-to-clinician publication from University of Minnesota Health

Access research-based content provided for physicians by physicians. Through Pediatric Consult, our goal is to share pediatric research and specialty updates and to serve as a partner to our colleagues in the medical community.

In each issue, you’ll find case studies, articles on best practices, postings on new and ongoing clinical trials, and updates on treatment options and patient-experience initiatives. You’ll also find information on physicians, referral numbers, and appointment access, should you choose to confer with us about your patient.

Find our free publication online at MHealth.org/consult. Sign up to receive the e-newsletter version of Pediatric Consult at MHealth.org/consultsubscribe. Or request all digital editions of Consult, including those focusing on cardiovascular care, cancer care, and adult specialties.
