

Tips for Home Crafters

Thank you for your kind donation of home crafted items. We appreciate the time and effort you put into these creations. Patients enjoy receiving items that were made for them with care and compassion like yours.

Our patients' number one favorite home crafted item is *fleece blankets*. The soft fabric can be a comfort to patients who are having a difficult time. This item is requested most often by patients.

Our patients are all ages. In choosing fleece, don't exclusively choose fabrics with designs that appeal to young children. We always have a shortage of fleece blankets for teens and adults, both male and female.

Our patients are all sizes. They enjoy blankets that are large enough to cover them, wrap around their shoulders, or throw over their knees.

Our patients value the softness of home crafted items. Please remember this if making items of materials other than fleece.

Our patients deserve and receive only the highest level of medical care, and we maintain the same standard in providing home crafted items. We love donations that are well-made using high quality materials. Please donate items you would be proud to give to your own loved ones.

Our patients must be protected from acquiring infections or sustaining allergic reactions while they are hospitalized. For this reason, all donations must be made from new, clean materials. If items are stored before donation, they must be in a pet-free, smoke-free area and sealed in a plastic bag in a clean environment.

Any message included should be religiously, politically, ethnically and culturally neutral. Messages should not be attached with a pin.

Please inform us when you are dropping off donations. We want to be there to accept your donation and to thank you for your generosity.
